

ST PETER'S HEALTH  
PARTNERS

A Member of Trinity Health

**Referrals** to St. Peter's ALS Regional Center can be made by **FAX** , including recent MD notes, EMG, MRI and lab reports when a diagnosis of ALS is probable. We do not diagnose.

**FAX #: 518-525-6800**

We will reach out to the patient or family within 48 hours and can usually schedule new ALS patients to be seen by our ALS physician and multidisciplinary team within 30 days of the referral or sooner if there are safety concerns. Patients will be seen by our multidisciplinary team which includes our physician, nursing, RT, PT, OT and Social Worker every 3 months until they become homebound and then our ALS RN's and other team members will go to the home. Our ALS RNs provide case management.

Pulmonary Function testing is done here at the ALS Center upon each clinic visit. Free loan of medical and communication equipment is also available. Nutrition and communication consults /clinics are held monthly.

Please feel free to reach out to us with any questions or concerns you may have.
