ST PETER'S HEALTH PARTNERS

## Spine and Neurosurgery

ST PETER'S HEALTH PARTNERS

## St. Peter's Hospital Spine and Neurosurgery was created when New York Spine and Neurosurgery Associates became a surgical practice of St. Peter's.

Through this partnership, St. Peter's can provide Albany, Schenectady, Troy, and Upstate New York's Capital Region with a highly-experienced group of spine and neurosurgical specialists supported by our state-of-the-art treatment facilities.

We work together to tailor the most advanced treatment options available to meet the specific needs of each patient.

## Our Services

It is our goal to provide comprehensive, specialized care for individuals suffering from numerous spinal and neurosurgical conditions including:

- neck pain
- back pain
- leg pain
- disc herniation
- cervical stenosis
- lumbar stenosis
- degenerative disc disease
- scoliosis
- brain tumors
- cranial nerve disorders
- spinal cord tumors
- brain hemorrhages
- trigeminal neuralgia
- carpal tunnel syndrome
- cubital tunnel syndrome
- Chiari malformation

## Our Team

Our physicians are supported by an outstanding staff, providing comprehensive, specialized care for patients suffering from numerous spinal and neurosurgical conditions. Our surgeons work collaboratively in making the most appropriate recommendations for each patient's individualized treatment plan, stressing a conservative approach when indicated.

## Advanced Treatment Options

St. Peter's Hospital Spine & Neurosurgery provides the most advanced treatments for the care of spinal, brain and peripheral nerve conditions. Conservative treatment options include physical therapy and image-guided spinal injections.

In more complex cases, surgical procedures such as discectomy, laminectomy, cervical fusions or lumbar fusions, and artificial disc replacements may be necessary.

## Evaluations

Initial outpatient evaluations will be performed as quickly as possible, generally within 72 hours. We have an on-site HDxT Platform, 1.5 Tesla GE short bore MRI, accredited by the American College of Radiology (ACR).
