

Remember when health care providers made house calls?

We still do.

Paul Heasley, MD, FACP
Medical Director/
Collaborating Physician

Kim Ryan, RN

Since 2013 ...

St. Peter's Health Partners Medical Associates has offered primary care in the home.

Our specialty is bringing primary care into patient homes to help manage those with chronic illnesses who are unable to get to a medical office.

With recent enhancements in technology, our team of advanced practitioners and collaborating physician deliver the same primary medical care in your home that you would receive in a traditional medical office.

In addition to the personal, quality care delivered in your home, you also have access to our providers by phone — 24 hours a day, 7 days a week, 365 days a year.

Short-term or Long-term Services

Our services can be used for just a few months to help get you back on track if you've been in the emergency department/ hospital frequently.

Or, if you regularly require in-home services or have a physical condition which makes it difficult for you to leave your home, you may qualify to receive our services on an ongoing basis.

We specialize in caring for people with chronic conditions such as:

- Respiratory issues, including chronic obstructive pulmonary disease (COPD) and pneumonia
- Cardiac issues, including congestive heart failure (CHF)
- Diabetes
- Dementia

Insurance

We are a Medicare and Medicaid provider and accept most private health insurance plans. The cost of this service is the same as an office visit. We simply bill your insurance as a primary care provider. You may pay a co-pay if your insurance requires you to do so.

Areas Served

Our services are available in the immediate Capital Region area.

Learn More

To learn more or to register for our services, please call us at **(518) 279-5700**.

Hours

Our regular office hours are Monday - Friday, 8 a.m. - 4 p.m. Our nurse practitioners are on call after hours, including weekends and holidays. If you have an urgent concern, please call (518) 279-5700 and ask to speak with the nurse practitioner on call.
