

MEET OUR HOSPITALIST TEAM

While you are in the hospital, an expert in hospital medicine called a Hospitalist will supervise and coordinate your care. You may see more than one member of our team during your stay.

Our Hospitalist Providers:

- Serve as the head of your health care team while you are in the hospital
- Notify your Primary Care Physician (PCP) when you are admitted and contact your PCP when you are discharged from the hospital
- May visit you anytime between 8 am and 6 pm
- Are available 24 hours a day, seven days a week

Your PCP will be responsible for your medical care after discharge, including prescription refills.

Please choose one spokesperson for discussing your care during your hospital stay. This person can also update other family members and friends on your condition.

In order to improve our care, we welcome feedback about your hospitalist provider. Please call (518) 270-3094 at any time with any questions or comments about your hospitalist. If you need assistance beyond what your hospitalist and nurse can provide, please request to speak with the Nurse Manager.
