

# Samaritan Hospital School of Nursing

---

ST PETER'S HEALTH PARTNERS

In the spring of 2020, all students at Samaritan Hospital School of Nursing were asked to complete the *Campus Climate Survey 2020*. The optional and anonymous survey was delivered through Survey Monkey. Students were made aware of this request through announcements in the classroom and postings on MESA. In total 142 students were offered the survey and 57 students completed the survey. Student responses indicate that 93% of students *strongly agree* or *agree* they feel safe on the campus. Additionally, 100% have not experienced unwanted sexual conduct at the school, and 98% of students *strongly agree/agree* that the college would take seriously any report of sexual assault.
